and Table of Results

Four residents of Park Street all left for vacation on Sunday evening. Each family left behind a pet, whom one of the local teenagers had agreed to take care of for them. Kristin, the local teenager, made a schedule of stops for each day to cover the five different pets she needed to take care of that week. Determine the last name of each family, the name of each pet, what type of animal it was, and in what order each pet was visited each day.

1. The Fords didn't leave Nobs. The parrot was visited last.
2. The first pet fed wasn't the horse, but the horse was fed just before Cutie.
3. The O'Henry family was the first stop, but a cat wasn't fed there. Puck wasn't the Smith family pet.
4. The dog wasn't called Nobs. The cat's name was Puck.
5. The last pet visited wasn't Nobs.
6. The Walkers didn't own a horse, but their pet was the second one fed. Cutie is the name of the parrot.
