The Marbles & Rows Puzzle

by Serhiy Grabarchuk

Place all the 9 squares with the color marbles within the square grid 3x3 above in such a way that in each horizontal and each vertical row four different color marbles lie. In other words, you have to get nine horizontal and nine vertical rows of marbles containing exactly four marbles of four different colors each. Distances between the marbles and their order in the rows don't matter.

Squares can be rotated 90°, 180°, or 270°, but they can't be turned over.
