The 26 Puzzle Re_Solution*
based on a puzzle by Professor Louis Hoffman

The object of the puzzle is to place in the big cross on the left the numbers 1 through 12 - exactly one number per cell - so that to make the magic sum of 26 in seven areas of the cross shown on the far left. Every of such areas consists of four squares.

The puzzle is sequel to The "Twenty-Six" Puzzle which is in our PuzzlePLAYGROUND sector as well.
