

The Zero Puzzle

by Peter Grabarchuk

Puzzles.COM

Home / Puzzle Playground / Puzzles / Tangrams /

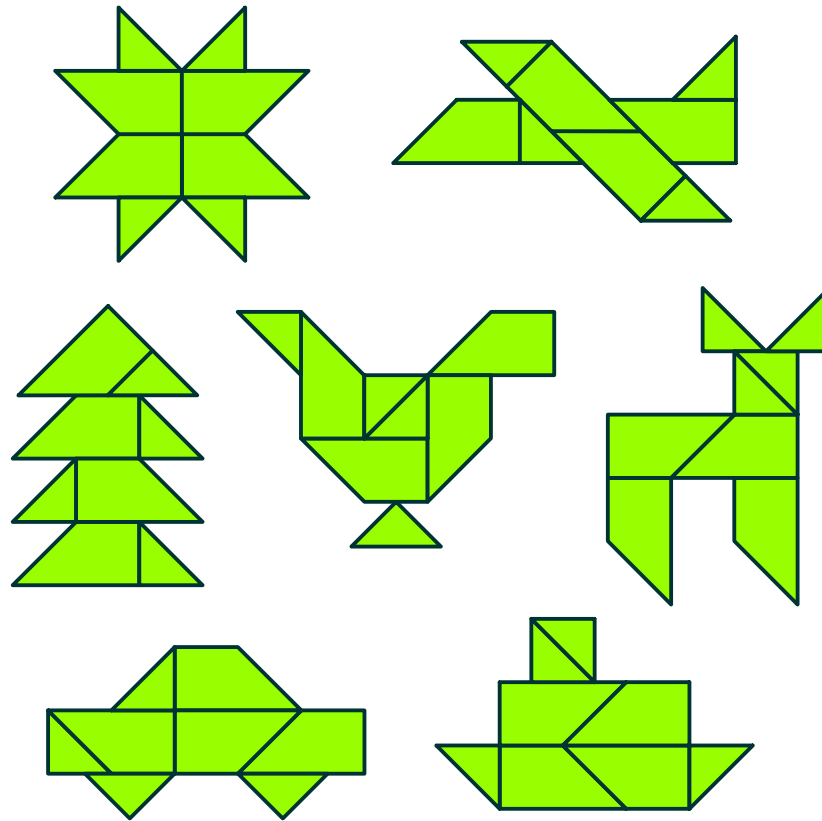

This puzzle consists of eight pieces. The pieces are designed in such a way that any small piece combined with any big one creates an 1x2 rectangle.

Print the pieces from the last page of this file, cut them out, and you're ready to play with this funny puzzle.

First try to assemble the shapes shown in the illustration on the left, using all the eight pieces for each of them. Then try to form new nice shapes on your own.
