

This is like Easy Space Travel. To get home, you will have to pass through 11 space stations and twelve space tunnels. For each space tunnel it takes one energy capsule. You have 24 energy capsules at the star base, and your spaceship can carry up to 8 at a time. You can store energy capsules at the space stations.

The objective is to be at station "Four" with 8 capsules, because that will take you all the way home. Here's how to get 8 capsules to station "Four".

Load 8 capsules at the Star Base, use 2 to get to station "Two", drop off 4 and use the remaining 2 to get back to Star Base. Pick up 8 more at Star Base, use 4 to get to station "Four", drop off 2, use the remaining 2 to get back to station "Two". Pick up 2 of the 4 capsules at station "Two" and use them to get back to Star Base. Pick up the last 8 capsules at Star Base, use 2 to get to station "Two", replace these with the 2 left at station "Two". Use 2 to get from station "Two" to station "Four". When you get to station "Four" you have 6 on board and 2 that you left there earlier. These 8 will get you home.
