New Job

by Shelly Hazard

Five neighbors, who happened to also be very good friends, were chatting at the annual neighborhood barbecue on Saturday night and discovered some startling news. By some strange coincidence, all five of them were starting new jobs during the following week and each was starting on a different day, in a different position, and in a different company! Determine the full name of each friend, the company and position of each friend's new job, and the day of the week each was starting the new job.

1. Frank, whose last name wasn't Wild, started his new job the day before the sales manager.
2. The five friends, in no particular order, were the new purchaser, the person who started on Thursday, Mary Prime, the person who worked at Fashionique, and the new test engineer.
3. Silvia, who didn't start her new job on Monday, wasn't the design engineer. The person whose last name was North started on Wednesday.
4. The friend whose last name was West started the new job two days before Cynthia, but the day after the person who worked for Sierra Computing.
5. The person who worked for Force Networks had an engineering position. Elliot started his new job on Friday.
6. The traffic controller, who wasn't Mary, worked for Metropolis. Mr. South didn't start on Tuesday. Frank worked for Maximus but not as an engineer.
