

Cubed Rectangles

by Peter Grabarchuk

Home / Puzzle Playground / Puzzles / Foldings /

Each of the A-H shapes scattered around the cube in the illustration consists of five squares and two rectangles. Some of the shapes can be folded into a 1x1x1 cube, while others cannot. Can you figure out which of the shapes can be folded into the cube, keeping in mind that only the folds along the dotted lines are allowed?

Cubed Rectangles

Solution

Home / Puzzle Playground / Puzzles / Foldings /

Shapes B, C, F, and G can be folded into a cube, while A, H, D, and E - cannot.
